etters to place a cony of the Daily, Weekly, or Semi-Weekly Ention in the Estata of every farmer, mechanic, and working-man in the country.

The subscription price of the Daily Ention is ten dollars per annum. The Tri-Weekly (published semi-weekly during the recess of Congress) is five dollars per annum, and contains all the reading matter which appears in the Daily. The Weekly Union is furnished to subscribers at the low rate of one dellar per annum, and is justify regarded as the cheapest political paper in the work). It is a large and handsofficily printed sheet, and contains as much reading matter in the course of a twelvement as would make nedes ardisory detices columns. It will be found to possess the advantages of both a political and a family sew paper. The most important political articles of the daily issues are transferred to the weekly, and during the sitting of Congress a careful abstract of the daily proceedings of the two houses is prepared exclusively for its columns. It contains, besides all important State papers of the year, election returns from every State in the Union, speeches of distinguished democrats in and out of Congress, interesting correspondence, a full summary of foreign and domestic news, and from week to week such information in regard to the agricultural, and commercial interests of the country as will be found, it is believed, of particular value.

That the Weekly Dinion is appreciated in the most substantial manner by democrats in every section of life Union, no better evidence meed be derired than is furnished by its rapidly-incressing circulation. Within eighteen months the and thoughts of the universition lite, and, with the slightest exertion in the part of our friends, its circulation can be increased to the hundred thousand copies before the close of the year. Will our friends exert themselves? Of the value of the Weekly Linkon to correct misrepresentations, expose falsehood, dispeleror, and to bring before the people the principles and measures of the democrate party

from motives which I think will be understood and appreciated by democratic everywhere.

In conclusion, I desire to say a few words to subscribers, and the such as may hereafter become subscribers. There is now owing to the Union establishment upwards of seventy thousand dollars for back subscriptions. These enormous arrearages are the result of the credit system. With the new volume upon which the Union has entered that system is abandoned, and hereafter the business of the establishment will be conducted on strictly oah principles. No subscriptions for the Dulty, Semi-weekly, or Weekly issue will be received unless accommanded with the advance navments. npanied with the advance payments.

THE ATTENTION of the community generally, and of house-builders particularly, is invited to the Keystone iteater, lately patented by J. D. Green, of l'hiladelphia.

All persons interested are solicited to call at our store and satisfy themselves of the superiory of this heater over all others in use. So successfully have the principles of combustion been applied in its construction, that although it presents a radiating surface of one hundred and fifty square feet, it requires thirty per cent. less coal than any furnace herestoffer manufactured.

Every improvement that an experience of thirty years in the furnace business could puggest has been applied in the production of the Keystone Heater, and its proprieters feel assured that, for efficiency and conomy of use, it is unsurpassed.
